Programme Overview

Programme	Dongshin University Faculty AI Competency Training
Subtitle	Generative AI from A to Z — Teaching with Claude
Dates	20-22 July 2026 (Mon-Wed)
Total hours	12 hours in person + 8 hours common VOD
Participants	Humanities & Arts track faculty (the common VOD is required for all faculty and instructors)
Instructor	Prof. Jeong Dong-yeop
Learning site	dsu.dreamitbiz.com
Practice board	padlet.com/aebon/dsu26

How to Use This Handout

- The handout comes in **three volumes, one per day**. Bring only that day's volume.
- Each period follows the same order: **learning goal** → **key content** → **practice prompt**.
- The practice prompts are **complete and ready to paste into Claude**. Change only the **[bracketed]** parts to match your own course and topic.
- Every prompt uses the same six-part structure: **[Role]·[Context]·[Request]·[Format]·[Example]·[Condition]**. Once this structure is familiar, you can write any request yourself.
- The 📦 **Output** line at the end of each period is what you actually make and take away in that session.
- Please watch the **four common VOD modules (8 hours)** before the in-person days.

Full Schedule — 3 Days in Person (12 hours)

Date	Theme	Sessions
Day 1 Mon 20 July 2026	Structuring Goals for Narrative, Debate & Writing Courses	Periods 1-2 · Mapping AI onto My Course & Drafting Objectives Periods 3-4 · Debate Guides, Questions & Case Sheets + Leveled Texts
Day 2 Tue 21 July 2026	Designing Essay & Critical-Thinking Assessments	Periods 1-2 · Assessment Types + Essay Items & Model Answers Periods 3-4 · Competency Rubrics + Scalable Feedback + Source Verification
Day 3 Wed 22 July 2026	AI Teaching Protocols & Vibe Coding	Periods 1-2 · AI Strategy for My Course + Competency Practice Scenarios Periods 3-4 · Vibe-Coding Class Tools + Ethics & Personal Protocol

Pre-learning — Common VOD (8 hours)

Module	Theme
Module 1	How LLMs Work & Where Faculty Can Use Them
Module 2	Prompt Engineering with Claude
Module 3	Creating Stage-by-Stage Teaching Materials with Claude
Module 4	Assessment Design, Quality Control & AI Ethics

The Three-Day Journey

Stage	What you take away
Pre-VOD	How AI produces text and where it fails (hallucination), prompting basics, and safe-use ground rules
Day 1	An AI map for your course · 3 learning objectives · one week's lesson plan · a debate guide · a case analysis sheet

Stage	What you take away
Day 2	Essay & critical items · step-by-step model answers · competency rubrics · a personalised feedback template · a source-checking routine
Day 3	An AI strategy for before/during/after class · competency practice scenarios · a vibe-coded class tool · your own one-page teaching protocol

AI helps with the preparation; the thinking stays with people. This is the guiding principle of the whole programme.
